

## Immunisation 2012

### Course Details

'Immunisation 2012' is an online learning program suitable for primary health care nurses in the general practice settings who are keen to update their immunisation knowledge.

This course does not enable a practice nurse to become an accredited immuniser.

### Course Content

The course includes six activities, each activity takes approximately one hour to complete. On completion of this module, participants will have an understanding of:

**Vaccination Processes** - the process of pre-vaccination counselling and appropriate techniques for vaccine administration

**Practice Issues** - the ways to obtain vaccinations and methods for appropriate transport

**Basics of Immunisation** - the relationship between the immune system and vaccine action

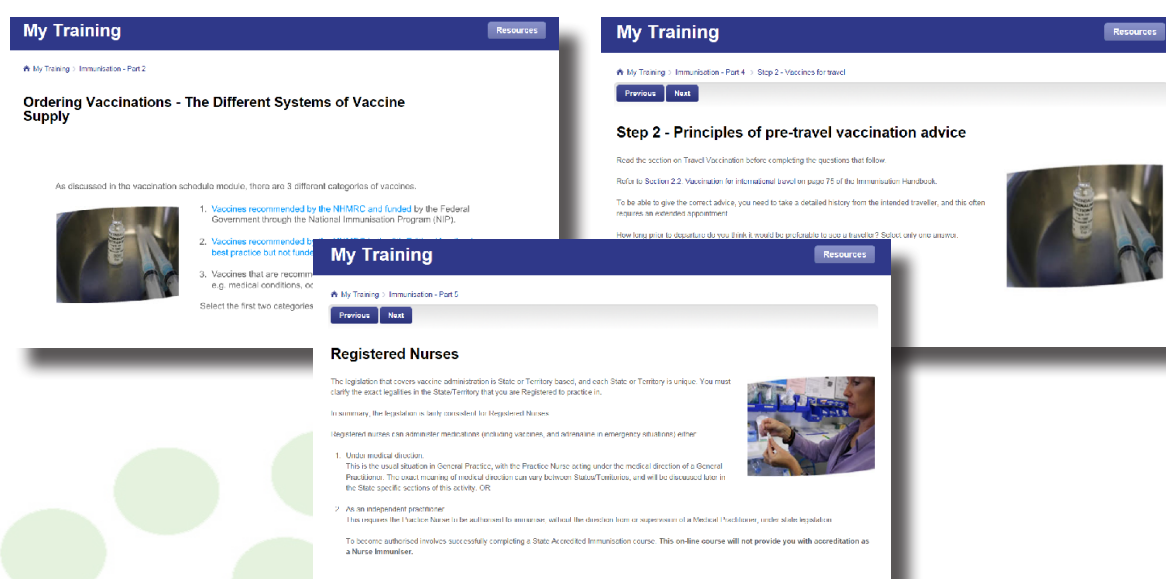

**Awareness and Prevention** - the principles of travel vaccination and appropriate travel health advice

**Medico-legal Issues** - vaccine administration regulations and nurse responsibility

**Special Risk Groups** - the issues related to vaccination in special risk groups and develop a vaccination policy and program

and many more issues....

This course has been developed by APNA together with the Australian Divisions of General Practice, the Australian Government Department of Health and Ageing and the Royal Australian College of General Practitioners, has developed online immunisation education modules for primary health care nurses. This is an interactive and enjoyable way to learn, and provides useful links to other sources of information. This course can be accessed via the computer and internet and be used by primary health care nurses to update immunisation knowledge.
