

## *Building Systems for Stronger Foundations in Aboriginal & Torres Strait Islander Health*

National, state and local-level speakers with expertise across policy, practice and research will come together in a series of linked presentations to identify key population health issues and challenges that must be addressed to create stronger foundations for Aboriginal and Torres Strait Islander health. This will be followed by a facilitated panel session where government representatives will have an opportunity to explain what they can do to solve the issues and challenges posted by the panel. The afternoon will provide workshop participants with opportunities for small group work aimed at generating priorities for action.

**Sunday 9 September
