

Eye care services and subsidised glasses for Aboriginal and Torres Strait Islander community members - *Victoria*

Eye examinations and eye health

Vision loss from diabetes, cataract and refractive error (the need for glasses) is common in Aboriginal communities in Victoria and **94% of vision loss is unnecessary as it is preventable or treatable**. Regular eye examinations, early detection and treatment of eye problems helps prevent vision loss. An eye examination with an optometrist generally takes about 40 minutes and allows investigation of all aspects of how your eyes are functioning. Your eyes will be tested for eye diseases such as cataract, diabetic eye disease, macular degeneration, glaucoma, dry eye, binocular vision problems (how the two eyes work together) and your glasses prescription. Drops to dilate the pupil are usually used (especially if you have diabetes) to allow the optometrist to check the health of the retina, macula and optic nerve at the back of the eye. If cataract surgery or laser treatment is needed, the optometrist will arrange a referral to an eye specialist (ophthalmologist) in a public hospital eye clinic or you may choose to see a private specialist.

Children's eye examinations will help to find any eye problems that affect your child's ability to see clearly and comfortably for near vision and long distance vision.

Victorian Aboriginal Spectacle Subsidy Scheme (\$10 scheme)

The Victorian Aboriginal Spectacle Subsidy Scheme (VASSS) is funded by the Victorian Department of Health as part of Koolin Balit the Victorian Government strategic directions for Aboriginal Health, and is supported by the Victorian Eyecare Service. It is administered by the Australian College of Optometry in partnership with Aboriginal Community Controlled Health Organisations and a network of optometrists in regional Victoria. It provides glasses at a subsidized rate of \$10 for all Aboriginal and Torres Strait Islander people living in Victoria. A range of metal and plastic frames approved by community Elders is available. Depending on your glasses correction, single vision lenses for long distance and/or reading, bifocals or multifocal lenses are available. Unfortunately transitions lenses and spare pairs are not available under the \$10 scheme but are available at extra cost (ask you optometrist for details).

Locations

The Australian College of Optometry has primary care optometry services for Aboriginal and Torres Strait Islander peoples at a range of locations around Melbourne that operated in partnership with the Victorian Eyecare Service. To arrange an appointment at any of the following clinics, please contact the site directly:

Aboriginal Health Services – Melbourne metropolitan area

Victorian Aboriginal Health Service (VAHS)
186 Nicholson St Fitzroy Phone 9419 3301
Optometry clinic operates Tuesdays and Fridays

Australian College of Optometry and the Victorian Eyecare Service

The Australian College of Optometry (ACO) is a not-for-profit organisation providing affordable eye care and glasses in Victoria. The ACO services are provided in partnership with the Victorian Eyecare Service (VES) funded by the Victorian Government Department of Health (Ageing and Aged Care Branch) in metropolitan, regional and rural areas in collaboration with a network of private practitioners. In conjunction with Medicare and patient contributions, the VES supports all of the ACO's clinical services in Victoria. The Australian Government Department of Health Visiting Optometrist Scheme (VOS) and the Rural Workforce Agency Victoria (RWAV) administered VicOutreach programs also support visiting services.

Optometrists are primary eye care practitioners registered with the Australian Health Practitioner Regulation Agency (AHPRA) and many have endorsement as Ophthalmic Medicines Prescribers.

The ACO is also a major provider of clinical education for optometry students in Australia and provides community education about eye care.

Partnerships

The Australian College of Optometry is a member of the Victorian Department of Health Koolin Balit Aboriginal Eye Health Advisory Group (formerly the Victorian Advisory Council on Koori Health (VACKH) Eye Health Subcommittee) that also includes representatives from VACCHO, the Department of Health Victoria, the Australian Government Department of Health, Indigenous Eye Health Unit (IEHU) University of Melbourne, Royal Victorian Eye and Ear Hospital (RVEEH), Victorian Aboriginal Health Service (VAHS), Vision Australia, Royal Australian and New Zealand College of Ophthalmologists (RANZCO), Vision 2020 Australia/Vision Initiative. The ACO also participates in the Vision 2020 Australia Aboriginal and Torres Strait Islander Committee, and the Optometrists Association Australia (OAA) Aboriginal and Torres Strait Islander Eye Health Working Group. We also collaborate with the Brien Holden Vision Institute (BHVI) that co-ordinates eye care programs in NT and NSW. We also work with Medicare Locals throughout Victoria.

The Victorian Eyecare Service is supported by the Victorian Government.
